D-86759 Fessenheim

Test results:

Claas Jaguar 900	Fuel consumption	Performance
Regular values	32-33 Ltr./ha (7.04-7.26 gallons/2.47 acres)	Not determined
with 	29-30 Ltr./ha (6.4-6.6 gallons/2.47 acres)	
Difference	- 9,1 %	

The measurement had been realized on an acreage of 15 ha (37 acres) with regular crop. Furthermore, the complete chaff had been scaled on a vehicle scale of a biogas plant.

Modified charge air tube in the engine compartment
